

Your Job Just Got Easier.

When Time & Field Flexibility Count, Start Counting On B-Line Ruff-In™ Pre-Fab Systems.

We did our homework. Saw what worked—and what didn't. Some electrical box support products don't give you any pre-fab options. Other pre-fab products don't give you any flexibility.

Well, our comprehensive line of Ruff-In Pre-Fab Systems gets it just right. They combine the labor/time saving benefits of a ready to install pre-fab product with the ability to accommodate design changes in the field. Plus, all our Ruff-In Pre-Fab Systems are assembled to order in just 3 to 5 days.

Don't waste time on your next job roughing it—get up to 70% in total installed cost savings with B-Line Ruff-In Pre-Fab Systems.

For more information, visit us at www.cooperbline.com/ruff-in and use our on-line calculator to determine the cost saving on your next job—and read a case study success story about Ruff-In Pre-Fab Systems.
