Pipe Hangers

A D V A N T A G E

Slide-Rite® Clevis Hanger

Features

B3100 - Standard

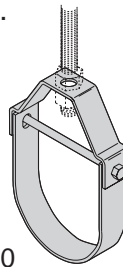

- Patented design.
- Pipe will not "pinch" when installing.
- 15° swing in either direction allows pipe to easily feed through.
- Engineered design aligns bolt eyes for a quicker overhead installation.
- UL approved.
- Available in sizes 2", 2 1/2", 3", 4", 5" & 6".
- Available in B-Line's exclusive Dura-Green®, Zinc Plated & Hot-Dipped Galvanized after fabrication.

B3104 - Light Duty

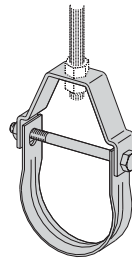

- All the features of B3100.
- Rolled strengthening rib increases rigidity.
- Bottom clevis design facilitates installation.
- Rolled form reduces the occurrence of plastic pipe being damaged by sharp edges.
- Available in sizes 2", 3" & 4".

Patent No.
5,924,655

B3100

B3104

In designing the Slide-Rite® we went straight to the experts - the installers. After careful analysis of their input, the Slide-Rite® was born. In fact, you could say the Slide-Rite® was designed by contractors for contractors.

Both the top and bottom were redesigned to reduce or eliminate the hassles of installing pipe. Whether pipe is installed by sliding or by lifting, the Slide-Rite® is engineered to ease the installation process.

The Slide-Rite® has a 15° limited bottom clevis and swing. This permits pipe to be installed without binding. When lifting pipe, the unique top design acts as a stop for the bottom clevis, causing the crossbolt holes to be automatically aligned.

Specify the Slide-Rite® on your next project and see why for better products it better be B-Line. The future of total support.

Dura-Green® Hangers

Features

- Out performs Red Primer and Electro-Zinc plating.
- Superior indoor corrosion protection.
- Durable and scratch resistant.
- Epoxy paint.
- Electrically bonded finish.
- Excellent for clean room applications - meets or exceeds 100 level clean room standards (see below).

B-Line's new Dura-Green® hangers offer an excellent alternative to traditional hanger finishes. The durable epoxy finish out-performs both red primer and electro-zinc plated products in standard salt spray tests conducted in accordance with ASTM B117. Additionally, Dura-Green® hangers offer long-term cost advantages over "plain finish" hangers.

Dura-Green® is a water borne epoxy paint applied by cathodic electro disposition and is available exclusively from B-Line. The nine-step process delivers a corrosion - resistant bonding of coating to material. Dura-Green® effectively, resists scratching and peeling.

Dura-Green® offers all the benefits to meet your hanger needs and is available exclusively from B-Line, **your pipeline to the future.**

B-Line's Dura-Green® channel meets or exceeds 100 level clean room standards. This was confirmed by testing the channel in accordance with Boeing (PCL) Standards, which are more stringent and complete than ASTM E595-93. Dura-Green® was found to be a superior finish, due in part to its proven application process.
