Pipe Hangers

Iso-Pipe™ Isolation Tape

Features

- Self-Fusing
- Easy to Use
- Prevents dissimilar metal contact
- Water resistant
- Resistant to vibration, shock and ozone
- Superior temperature range

When your performance meets our performance...

Whether the need is isolating pipe from the support, or a temporary repair of a hose, Iso-Pipe™ will out perform vinyl tape, duct tape, and heat shrinkable tubing. Bonding strength does not depend on surface condition or messy adhesives. Iso-Pipe™ won't crack, skate or separate with thermal movement. It is resistant to vibration, shock and Ozone. Having a temperature range of -140°F (-60° C) to 392° F (200° C) makes Iso-Pipe™ the quality choice for performance in most plumbing installations.

Hundreds of Plumbing, HVAC/R and PVF applications

Seal joints in hot air ducts. Temporary repair of punctured hoses (cooling, garden, etc.). Seal threaded hardware from elements. Isolate tubing from metal studs or structure. Protect exposed pipe threads. Seal insulation joints. Wrap tool handles.

Easy to Use

Simply wrap the object overlapping each layer. The normal pressure of wrapping is all that is required for bonding. To properly isolate and protect not only copper tubing, but also plastic pipe, stock up and use Cooper B-Line's Iso-Pipe™ isolation wrap. A quality choice for quality installations.

VIBRA CLAMPS (BVT & BVP)

- Dampens vibration and noise
- Eliminates galvanic metal to metal contact
- Secures tubing firmly to strut
- Includes cushion, clamp and hardware
- Finishes: YZN or SS4

B1999 VIBRA-CUSHION™

- Use with standard B-Line pipe straps
- Inhibits galvanic corrosion
- -75°F to 375°F temperature range
- Dampens sound and vibration

VIBRA-TROL™

- Complete line of vibration isolation products
- Vibration pads
- Neoprene mounts
- Free standing and house spring mounts
- Vibration hangers
