

## Consider the Advantages of Cooper B-Line Grip Strut® Safety Grating vs. Traditional Bar Grating

### Just One Slip Can Add Substantial Operating Costs

- OSHA statistics show slips, trips, and falls as the **#2** cause for injury in the workplace
- Over **85%** of these injuries are a result of floor, walkway, or ground surface conditions
- Certified tests reveal Cooper B-Line Grip Strut® **outperforms** bar grating in slip resistance almost **2-to-1**
- Consider the total cost to the business for the life of the product - potential to reduce workers compensation costs, lower insurance costs, increase productivity, and reduce significant injuries
- *Don't sacrifice the safety of your employees* - specify Cooper B-Line Grip Strut® on your next grating project

- Easy to install - planks can be handled by one or two installers eliminating the need for additional mechanical assist
- Walkways feature integrated OSHA compliant toe boards - no additional components and assembly
- High load capacity; long product life
- Self cleaning maintenance free design
- Cooper B-Line is the only manufacturer of Heavy Duty Grip Strut® - now available with non-serrated surface
- Ideal for stair treads, working platforms, and walkways
